

SUREPHARM BENEFITS FROM THE BEC 300'S SHORT SET-UP TIMES AND RELIABILITY

“ Set-up times are unproductive. That's why we need to keep them as short as possible. We find the **BEC 300 blister line** very convenient,

because compared to our previous systems, changing products is faster and simpler. It's very user-friendly and runs stably and reliably.

Julian Richardson, Managing Director Surepharm

THE CHALLENGES

- The packaging of more than ten medicinal products in different pack sizes on a single line
- Small to medium batch sizes require quick format changes
- Set-up times need to be reduced
- Easy operation and cleaning of the machine

THE SOLUTION

The BEC 300 blister line

- Compact, complete system consisting of a blister machine and cartoning module for batches of up to 70,000 packs
- Customer-specific format parts
- Supplemented by a final packer with bundler

Service

- Prompt service thanks to the regional support of Uhlmann UK

THE RESULTS

Significantly shorter set-up times

due to three-dimensional conversion to a new format in less than 30 minutes

- **Time savings** in terms of line clearance and resulting in reduced follow-up costs
- **Substantial increase** in productivity

Surepharm® Surepharm Services Ltd.
from Burton on Trent
(Great Britain) is a one-

stop provider specializing in the contract manufacturing of generic and original products. Every year, the company produces and packages around 1 billion tablets and hard capsules for human and veterinary medicine – and it does so very successfully. Since being founded in 1990, Surepharm has been growing steadily.

BEC 300: GREATER FLEXIBILITY FOR SMALLER AND MEDIUM-SIZED BATCHES
