

TRAININGPLUS

CLEVER TRAINING,
CLEVER EMPLOYEES.

TRAININGPLUS

Excellent skills matched to your Uhlmann machines and lines are the objective of TrainingPlus. We tailor a long-term program to upskill your employees. Naturally, all aspects comply with GMP guidelines and the training schedules are based on freely combinable modules. These are geared to various target groups,

e.g., operators, technical staff, or maintenance personnel, and take the proficiency level of the participants as well as the machine types/configurations into account. After theoretical and practical testing, a certificate documents successful completion.

FIVE MODULES FOR LONG-TERM RELIABLE AND EFFICIENT PACKAGING:

- A Operation**
Objective: improved output resulting from proficient machine and component operation
Contents: HMI, machines, inspection systems, printers, auxiliary components, Track & Trace
- B Format changeovers**
Objective: correct, fast, and efficient resetting of machines, as well as inspection and printing systems
Contents: prepare changeovers, load/fit formats, readjustments, trial run, optimize settings, production run
- C Maintenance**
Objective: maximum machine availability on the basis of effectively planned, in-house maintenance
Contents: maintenance and repair, to-do lists, safety instruction, basic settings, lubrication schedule, wearing and spare parts
- D Electrics/electronics**
Objective: broaden specific electrics/electronics know-how, enabling malfunction analysis and troubleshooting
Contents: electrics documentation, spare parts, circuit diagrams, sensors
- E Administration**
Objective: confident handling of system administration tasks, effective use of machine data, backup management
Contents: user, order, and data management, text importing and processing, audit trail reports, production reports

TRAININGPLUS

PRACTICAL, INDIVIDUAL, INTENSIVE: INSTRUCTION AT THE UHLMANN TRAINING CENTER

Our training center in Laupheim offers ideal conditions for your employees to learn quickly and effectively. Modern training facilities and appropriate machines are at their disposal. In addition to practicing and testing, the taught skills can and

should be repeated until they become routine. A key benefit of instruction on machines at the Uhlmann training center is that your production can continue as usual. No changes need to be made to your machine, so validation remains unaffected.

CONVINCING SERVICES

- Analysis based on your requirements: target group, training objective, level of proficiency
- Preparation of training schedules: concept, contents, venue, time frame, trainer
- Full training: presentation, exhibits, hands-on practice, simulation, videos
- Progress monitoring: multiple-choice tests, production situation, certificate
- Refresher and special advanced training: follow-up training, implementation monitoring, improvements

YOUR ADDED BENEFITS

- Strategically trained employees with an updated level of knowledge
- Practically oriented know-how and skills for immediate application
- Confident, independent machine and component handling
- Added self-confidence
- Strengthened proactive error management
- Long-term personnel development perspectives for your employees
- Increased machine availability and operational safety
- Sustained machine and line efficiency

Open training sessions:

Independent of TrainingPlus, we offer open training sessions on individual topics from the program, e.g., inspection and printing systems, and on specific issues, e.g., print registration. Simply contact us: training@uhlmann.de
