

BEC 300 COMBINES CONTAINMENT AND FLEXIBILITY

“ With our two new containment lines, which also integrate the blister lines, operator and product safety was of course important. But three things have been added: the

reliability of the machines, a high degree of flexibility and excellent service. That's what we found with Uhlmann and its partner companies at Excellence United.

Gustavo Mezzalira, Plant Director at PiSA

THE CHALLENGES

- Extremely high requirements for operator protection
- Complete flexibility for packaging tablets and capsules in six different configurations
- Excellent quality and reliability of the machines
- Solution from a single source through the Excellence United companies, which also include Uhlmann
- Fast, competent service on-site

THE SOLUTION

Two high-containment systems based on the BEC 300 blister line:

- Protection class OEB3 for the packaging of immuno-suppressants
- Protection class OEB5 for oncological products
- Individual pressure zone and conditioning concept

BEC 300

- Powerful and process-stable
- Optimally convertible to containment plants

Service

- Individual service contract in cooperation with Excellence United partner Fette Compacting Mexico

THE RESULTS

- **High** operator and product protection
- **Quick** format change and cleaning
- **Future-proof solution** thanks to high level of flexibility
- **High level of efficiency** due to operators working without special protective suits and with regular breaks

PiSA Farmacéutica has been developing products and services for public and private healthcare operators in Mexico,

the United States, Latin America and the Caribbean for over 75 years. The company has 16 manufacturing facilities in Mexico, where more than 20,000 employees produce items for approximately 1,500 pharmaceutical brands.

BEC 300: GREATER FLEXIBILITY FOR SMALLER AND MEDIUM-SIZED BATCHES

POWERFUL

Powerful, complete system for packaging small and medium-sized batches of up to 70,000 packs

FLEXIBLE

Greater flexibility in dynamic markets thanks to processing of all common solid formats and quick format changes in less than 30 minutes

SAFE

Maximum safety and performance thanks to reliable technology and simple, intuitive operation

FAST

Short delivery times and swift commissioning for unforeseen requirements

DIGITAL

High level of efficiency thanks to seamless integration into fully automated production environments
