

ProductivityPlus more than pays for itself through added output. Our operational excellence experts scrutinize the areas line equipment, production material, line environment, personnel, and utilized procedures. Using a tailored combination of variable service modules, they then help you to identify hidden potential for greater added value. For optimized packaging processes, additional line output, and higher productivity.

ProductivityPlus

ANALYSIS AND SOLUTION IN ONE.

Audit trail data evaluation	Potential analysis	Staff knowledge assessment	On-site production analysis		
<ul style="list-style-type: none"> Quarterly evaluation of audit trail data over a 12-month period Presentation of results with action recommendations (DE or EN) 	<ul style="list-style-type: none"> Preliminary analysis using customer data Batch history evaluation on the basis of a 6-month batch data analysis; selection of three products/formats with the greatest potential Presentation of results (DE or EN) 	<ul style="list-style-type: none"> Anonymous assessment of knowledge level of the involved line personnel (operators, mechanics, electricians, etc.) Test in the national language 	<ul style="list-style-type: none"> Process analysis of the machine/line Evaluation of machine and process knowledge Daily review of results Two OPEX experts/two days Summary of reviewed results with action recommendations 		
			 Detailed analysis report	 On-site follow-up analysis	 Sustainability package
			<ul style="list-style-type: none"> Summary of all relevant findings with proposed solutions in an extensive report (approx. 100 pages, DE or EN) Presentation of summary via WebEx 	<ul style="list-style-type: none"> Review of the implemented solutions and identification of secondary potential Two OPEX experts/three days Daily review of results Summary of reviewed results with detailed action recommendations 	<ul style="list-style-type: none"> Implementation/progress review using checklists One OPEX expert/two days Sustainability report with summary of results
