Parenteral Tray Center PTC 200

Uhlmann
UHLMANN GROUP

Experience
the PTC 200 live

Packaging parenteral products sustainably, flexibly and safely

The PTC 200 parenteral tray center is designed for processing sustainable cardboard packaging. Parenteral products are packed in cardboard trays in a safe and environmentally-friendly manner. The PTC 200 also reliably processes plastic or paper fiber trays and all common product formats, from ampoules and syringes to pens, as well as a variety of supplements into a wide variety of product presentations with side-loading/top-opening cartons. All processes on the machine are digitally recorded and monitored. With the SyPro 2.0+ syringe delivery system with integrated medical device tracking, a UDI code reader records the individual syringes directly in the feeding process. This enables seamless tracking along the entire packaging line all the way to the pharmacy.

- **Flexible:** Thanks to variable feeding for different pharmaceutical products
- **Versatile:** Due to the possibility of processing cardboard, paper fiber and plastic
- **Traceable:** Thanks to Medical Device Tracking and Cold Chain Tracking

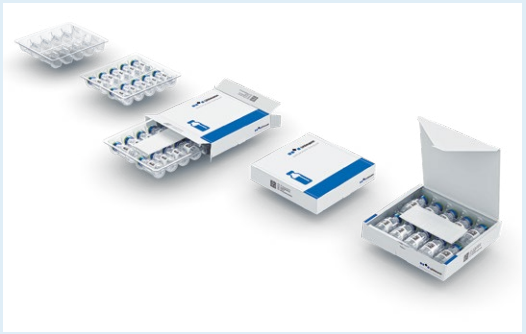
Performance data at a glance

Max. output	120 or 200* trays/min. 120 or 200* cartons/min.
Max. tray size [A x B x H]	175/80* x 40 x 245 mm
Max. carton size [A x B x H]	180 or 85* x 105 x 250 mm

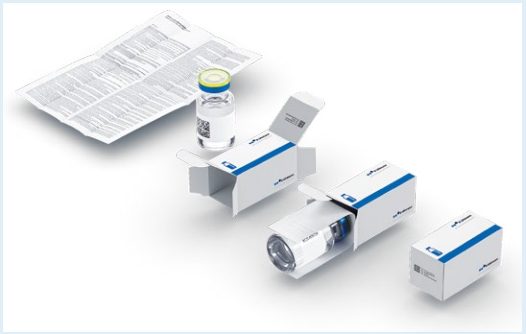
*optional upgrades

A combi pack for syringe, vial and needles including medical device tracking in a side-loading, top-opening carton.

A large volume cardboard tray for 50 vials including medical device tracking in a side-loading, top-opening folding box.



A blister tray for 10 vials including medical device tracking in a side-loading carton.



A vial “Direct in Carton” including medical device tracking

PEXCITE

Controlling complex lines in a comprehensive, user-friendly and safe way. Simplify, accelerate and plan services on demand

Uhlmann’s proprietary Pexcite software platform networks both Uhlmann lines as well as machines and equipment from other manufacturers along with your pharmaceutical production processes – for greater connectivity, transparency and maximum safety – your the entire life cycle of their lines.
