

SPEED UP YOUR MAINTENANCE AS MUCH AS POSSIBLE

Efficient maintenance is achieved on the basis of short delivery and installation times, the straightforward exchange of spare parts, as well as a deposit-return system that helps save resources. Lower life-cycle costs for your packaging machine and speed up your maintenance.

WHAT WE OFFER

We offer you preassembled modules with an availability guarantee instead of separate spare parts. Should a machine stoppage occur, we can supply the assembly within a matter of days. It is quickly installed so the machine is up and running again in the shortest possible time. Assemblies removed during the maintenance process are returned to Uhlmann. This helps save resources as they are overhauled and upgraded to latest standards.
